FO FEMALES IN DELICATE HEALTH. The Peristaltic Lozenges are strongly recommended to the notice of every Lady, having obtained the sanction and approbation of several eminent gentlemen of the Medical Profession, as a safe and valuable, medicine 'in removing obstructions and relieving all other inconveniences to which the female frame is liable, especially those which arise of an early period of life, from want of exercise and general debility of the system. They create an appetite, correct indigestion, remove giddiness and nervous head ache, and are eminently usefulin windy disorders, pains in the A pleasantly situated three story Brick
House, on the Corner of Charles and Breath and palpitation of the mat any time and under any circumstances. The most delicate female, when an aperient is required, may have recourse to them, and they will act as a mod out-buildings. Possession given immediately, affections which so frequently arise from continued constipation. TO SEAFARING PEOPLE AND TRAVEL-

When they are to be carried to sea, they ought always to be staited from the box in which they are packed and out into tight bottles. In this way they may be kept good for any length of time.

The proprietor offers them as a cure for nervous head ache and general neuralgic affections. Very remarkable cures might be published if thought necessary.
Mr. Milhan, the agent in New York, writes

"I think it no longer necessary to advertise to the extent, as beretofore; the Lozenges are now well known. I am daily receiving the most satisfactory accounts of them; and I shall always recommend them to my oustomers?

The very questionable reputation which a medi-cine derives from the fashionable practice of pub-tishing a long list of certificates. From persons whom nobody knows has induced the proprietor to orego the opportunity of offering to the public the many commendations which he is daily receiving of these Lozenges, trusting rather to their own merits, which will be apparent to all on trial, and the respectability of his numerous agents.

These Lozenges have been in use for two years. the general approbation they have met with, from our first families, establishes their merits and makes further remarks unnecessary. They are packed in boxes which may be carried in the pocket and sold at fifty cents per box.

Hæmorrhoids, or the Piles are occasioned by ha bitual costiveness, plethers, hard riding on horse back and not unfrequently by the use of aloetic purgatives. The popular nostrum known as 'Veg-ctable Pills,' 'Universal Pills' and the like, are highly injurious when taken for a long time, being composed calefly of sides, which ought never to be taken by persons subject to Piles.

This complaint'is not necessarily and of itself, immediately dangerous; in fact, in some instances it may be considered as a salutary evacuation, espoeially in plethoric or full blooded persons :- but when suffered to remain long, it is the cause of many sarious and even hazardous diseases.

The remedy now offered to the public, is prepared by the undersigned, from the recipe of a highly eminest practitioner in a neighboring city, and from the numerous asses absolutely cured by the use of it, he feels warranted in offering it as a

HANGOR.

It has been tather hard to have Bangor hold the true reputation which belonged to her as a city and an leve of busine . Bither her interested to ande must be too extravagant in her B. 4 Weer her dissppointed enemies equally extravagent and bitter in reviling her. The credit of the city has been inflated by the pretended twig-dection of capital and con gquent great prolingin. It has been reduced also by failures A lines and inisrepresentation.

We rejoice however, to find that her real poaffin, and her jest claims to consideration are at length likely to be properly understood, and justly appreciated. A healthy business was carried on the last schoon, and heavy debts were paid by our citizens to their creditors abroad. The present season also witnesses a great business; and although the retail grocery and provision busings is a little overgrown for the present, and & fen gruniblers are found, the real business of the city is getting along very well. The high expectations, and the aubicquent despondency of other years have given place to an honest confidence which may safely be relied upon.

Our Portland neighbors are bestiring themselves "for" a rall lead to the interior of New Hampehire, and Vermont, and well they may, for they feel that sometifing of the kind must be done or their city cannot hope to increase. We could wish well for Portland, if for nothing more than the beauty of its location, embosomed in the most delightful and refreshing scenefy that the eye ever rested upon; for the sterling Whig principles and honesty of its business men, and for the charming faces and good hearts of its girls, but these alone, however pleasant and desirable, are not sufficient to secure a prosperous business. This, our Portland friends already discover, and their proximity to this grammar are pointed out, we give a few exother markets, Boston in particular, is already amples, taken at random. felt as rather a serious inconvenience. Nature has not provided Portland with the resources for business that she has Rangor, and unless art, promoted by capital, shall undertake to mend the matter, affairs will soon be worse there than they now appear. It may be that there is sufficient enterprize and love of Portland to bring this about, but at the best, Boston influence and capital will make a strong competition.

With Bangor the case is vastly different. we have named Fortland only as a strong illustration of our case, and not from any ill motive to the prosperity to that goodly bity. But we must repeat, with Bangor the case is different. It is for the interest of Boston that Bangor anould increase.

Onr city stands at the head of navigation on the noble Penobecot, with its wighty waters constantly rushing to the sea. Above us, the tirs! Suppose we supply the clipsis river with its tributaries, winds through a vest tract of country, now covered with good timber and the soil of excellent quality for cultivation. We have a back country to the north, stretching off to the highlands on the borders of Canaiday in which territory are to be found with of the best of farming towns, and shere the greatest improvements in culture are to be found in speak with suitable moderation, and mills too of the best constinction, are now busy on our waser falls, in the manufacture of lumber, cloths, | noun." and other articles. Slate quarries of great richness and vest extent, and iron ore in sufficient quantities to furnish a suitable supply for furnaces; lime rock for building, and for manure abound; ship timber of fine quality and in abundance; in short, nature has emphatically pliced her approval upon our location and surrounded "us with so great a cluster of valuable resources, that Danger must be a place of incleasing business and size, though her present

population should will it otherwise. We challenge any identito take the map of the State, and after piving it's careful examin. ation, to cone to a different conclusion. A spot similarly situated in the new States; with the | nify both males and females!' Surely neither same advantages over every rival, would be con- the word parent, nor child, nor friend, nor persidered the wonder of the world, and thou, indaof people, and millions of capital, would rush tewards it, and build it up in a day.

But though nature has done so much for this city, the expenditure of capital in improvements would be minte advantageous, and pay a greater income than almost any where else -The necessity for it way seem to be lest, but the profit of it -- anid assuredly be greater.

It may be that we have a strong feeling of citizenship for Bangor, indeed we are willing to admit this, and the foregoing among other reasone, might be given for it. The view of this city we have taken, is awong the causes, and

We are fully confident that the future greatmed at Bangor is already written in the improver ents and growth of the convounding-back equatry, Matching fro . the Avontune for the Benneben. REVIEW OF PARKER & FOX'S GRAM-MAR.

This is a pamphlet of thirty eight pages, written in good style, and with great kennness and force. We gather from the publishers advertisement that the Review was written at the request of several friends of common schools, who had become natisfied that the teachers employed in these important institutions, had for some time exerted an under influence in the relection of elementary school books such an influenes as to preclude the introduction by the School Committee, of any work, however meri torious it might be, unless proposed by one of their own number ; and to open the eyes of the public generally touble fact, it is now published Under this impression the only wonder in that it has been delayed at all. -- We should like that the whole system of ashool book making and publishing were generally known. That there have been great evils arising from it, not necessarily connected with the business, we think few can deny.

The Grammar which the author of the pamphilet before us has so closely and severely reviewed, was prepared by R. G. Parker A. M. Principal of the Franklin Grammar school; and Charles Fox, A. M. Principal of the Boylston Grammar school, Boston.

We are not acquainted with either of these men, and we should think that hereafter they would scarcely know themselves, since they have been flayed alive by the cutting sarcasins of the reviewer.

To show the manner in which the errors in

These sentences have the same construction; but her 'like' the same meaning in both ? Are 'noun' and 'man' in the same case? No. 'Noun' is in the objective case and 'men' in the nomina-

"Notice. Children will not be admitted to the 'Sawing Cincin,' unless accompenied by their perents."

"My military friends introduced me to sever-

alspersons of distinction on the field." After going over the whole work in this manner, the reviewer arrives at the following conclusions which he presents as propositions to allwho may feel inclined to delend the work, or the continuance as a text book in achools.

1. That the Treatian contains more Fulse Syntax' violations of the Rules of Rheteric and lapses in lagir, them may other work of equaare ever published, not excepting. "Lord Timethy Dexter's Pickle for the Knowing Ones' !"

2. "That it does not contain one important rule, definition, nor principle, that is not given in more appropriate language, in several Graintre published previous to 1534."

The political situation of the country, too, is what must create anxiety in the minds of avery one who thinks upon it. Ireland is his a vol-cano ready to bant out: Soutland, always poer, is now more poor than ever, for the manufacturers are parting with their lands in scores and hundreds, so they see ruit in the very first de-cline of business. The north of England is kept from open revolt only by means of the over-whelming power of military awe. In the north of it) there is always an imposing assemblage of militarys. The additional forces lately sent in, amount to 18,000 men. Altogether, there are 20,000 soldiers, besides cavalry and artillery in in Bristol, in Faunton and in Wales, there is the mane necessity for keeping down riot by watens of the musket and the bayonet. Non from whence have some these truops? From Ireland! The whole military force in Ireland now is not more than 3000 men, or a sixth of what during the last thirty years, has been considered neceseary to keep peace within that Island. It is true the trish are under the influence of O'Conneti, who discussifyet i ! - 4- ---intain grace. seeing that it is agitation which gives him the surrection would dake it away ; but who can

Last night, the City Marshal, with Mesara Meservy and Hues, placed themselves in and around Mr. Merrill a building. The thief return ed a quarter before one this morning, lighted a lamp with a loce foco match taken from a bunch of matches in her possession, and placed it upon the table. Mr. Meservy was in the house, and immediately arrested her and soon after she was co-wa-ited to pri on; where she now is, preparatory to her examination and trial.

The Police officers found in the house occupied by the thief, all the articles which had been stolen from the house of Paul E. Merrill and. is from two to three hundred dollars. Among the goods stolen from Mrs. Quincy's, we no ticed in the Marshal's office, mantel ornaments, a large netral lamp, a portrait of Mr. Quincy, and a chest of clothing. There were other goods not claimed this morning.

It appears that this Mary A. Dyer, has kept her hou, merely as a Depository of stolen goods. But little or no furniture wes found; and her bed consisted simply of two pinows and a bed covering. Nearly every thing in the house appeared to be stolen. The thief has not only proved herself a great thief, but a great the flower appeared to the officers two or three liar. INDIANA METWANTER. IVERof the North American College of Health 2 auto-lia down Woodings of D. C. January 2, 2 k, FOR THE CURF OF SLL DISEASE.

The beautiful and simple theory of one disease and one remedy, as practized by our native Indians, and advicated by the North American College of Hazith, is beginning now to be generally under-stood. Thousands who have heretofore ministra-ed the necessity of a peculiar medicine for every particular disease, now as strenuously contend that as all our asiadies proceed from one cause, so one medicine, capable of removing that cause, will cure every disease incident to man.

If disease of the head, or the feet, or the lungs, iver, &c. each require a poculiar kind of medicine to heal them, would not those parts each require particular kind of food for their nourishmens? But as we know that good, wholesome tood nourishes all parts of the system alike, it is manifest therefure, that a good and proper vegetable medeins will, by purifying the blood, search out and remove

discase from every part of the body.

According to the Natural or Indian theory, all our complaints owe their origin to one cause, viz; the shutting up of those outlets, (the skin, kidneys and howels) through which nature has intended that all corrupt and useless matters shall be carried from the body. When these become closed, it is like shutting up of a water course, either the accumulated waters find a new outlet or the country becomes inandated ; just so with the human body ; if the natural drains become closed, the hymors accuform of various diseases, such as fevers, rheumatism, cutaneous eruptions, goul, &c. or appoplery and death ends the scene. The only sensible method, therefore, of preventing and curing disease, is to keep the body continually purged of all the useless and corrupt humors; and for this purpose no medicine will be found so effectual, as the Indian Purgative, because it is the only one whose power extends to the opening of all the natural drains of the body. Whilst under the influence of this rangufar medicine, the body will be kept in a gonile bill effectual perspiration; a proper discharge of unite will be experienced, the stomach and bowels will be thoroughly cleansed; and the blood will be stimulated to purify itself.

One very common objection orged by some who but partially understand the principle of curing disease by purgation, as promulgated by the North American College of Health, is that although reiterated purging will cure disease; yet that the repeated exercising of those organs will injure or do-stroy their tone. Those who raise objections appear to forget that purging is as natural to the bowels as walking is to the feet or labor to the hands and like every other function must be duly exercised in order to retain thei Penergies.

How persons can comprehend the action of wegctable purgatives; by what my sterious process the blood is by them stimulated to deposite its imporities into the howels; or how those organs are excited to evacuate the corrupt humors from the hood all can understand when they experience relief. The gentlemen who compose the North American College of Health would therefore carnestly invite all who are suffering from disease of any kind to make a trial of the Indian Vegetable Pills. They beg leave to assure the American Public that said ladian l'ill are a purgative so justly balanced, that they may heraken at all times and under all circumstances with perfect safety, and no dose, however small, but will afford some relief, and no quantity, however large, (if it be such as is required

to open the howels) can possibly injure.

Assisting Nature should be our chief study, and for this purpose, the Indian Purgative will be found the most effectual medicine ever offered to the public. Its power being always directed to the opening of those drains, through which nature carries out all impurities from the body; it affords precisely the amount of assistance she requires to enable her to cure every variety of disease. It being a vegetable preparation, and acting in hurmony with our constitution, it is always the right medicing to be admin-

istered. A single dose will in most cases afford relief, and if persevered with, will always effect a cure. In using the Indian Porgative, (or Indian Vegetable Pills;) no care is necessary, except in taking such as shall operate freely upon the bowels. If this effect is obtained every other function will be duly performed. The skin and kilneys will seek he stimulated to discharge their work. and kidneys will each be stimulated to discharge their por tion of impurities; and the energy, imparted by this ex-traordinary medicine to the blood, will enable that fluid to disengage and deposite its impure particles into the bowels; from whence they will be carried off by the reg-

bowels; from whence they will be carried off by the regular action of those organs.

One great advantage, possessed by the Indian Pills over every other medicine is, that as they cure—disease upon natural principles and suit all complaints, they are always the right medicine to be administered; and, consequently, can never be taken improperly; therefore, no, time should be lost in listening to contradictory advice; the only inquiry should be, is the person sick-? if so, the sooner a few doses of the Indian Pills are administered; the sooner will the nationable restored to be alth and usefulness. will the patient-be restored to lamith and usefulness.

Price 25 cents per box with full directions.

Callege of Horse.

This assertion may startle the reeder and appear to him abourd and ridiculous, yet nevertheless it is true. What is disease? When properly considered it is only an effort of nature to expel from the body some offending cause. We are so constituted that there is a constant bendency in nature to exact or throw the constant bendency. in nature to axanl or throw off whatsoever is injurious to health. This is done by uring, atpol, sweat, expectora-tion, vomit, &c. These are the sewers of the body thro' which all the useless and decayed matter is carried off; which all the useless and decayed matter is carried off; and so long as they are kept open, so long will the body continue in health. But when from setting improper food or other cause the bowels become contret, or andder transitions from heat to cold, the pores of the skin become closed, or any of the observate become electricid, evil consequences are such as the body. The fool matter which should escape by these pullets instead of presing off as nature intended, is retained in the body, and either putrisfies in the stomach, or is taken up by the absorbent vessels and added to the circulation. This impure matte floating about the system, in the blood is discuss in a latent form. It somatimes agrees harmless for a while, but not very always on the slight soon discovers the intruders but nature always on the alert soon discovers the introdors and immediately commontes a all uggle for their capulsion it will be observed that in order to accomplish this under-taking she always directs life efforts to remove offending matters (discase.) It is not wonderful that under such cir-cumstences the body should sink, under the conflict. As-sisting nature, should be our chief study and for this pur-pose no medicine will be found so effectual as the Indian Pargative Pills, as their effects extend to every one of the natural drains. Whilst under its influence the body will be kept in a gentle but effectual perspiration. The blood will throw off the grosser particles of its impropriety into the howels from which it with a expelled by the purgative quality of the Pills. And unit overy circumstance, if properly persevered with, it is impossible but that every disease must yield to their powerful influence.

Thus briefly have we evidenced to addess ourselve to the underktanding of the reader. In show to him is se condensed and conclusive a manner as possible, the grounds and reasons why we claim Extraordinary Towers for the

WDIAN FURGATIVE PITCH.

Out other fact we would prid charly stamp upon the memory of the reader. It is universally known and acknowledged that the Indians are the most skillful in the knowledged that the Indisman, the most skillful in the cure of discasses, of any people in the world; and common sense teaches us that herbs which spring spontaneously from our native soil, if progress scanished and spplied, are the best shaped to our Constitutions. Therefore when 4 coupled with the shove? We sware the reader that the LNLIAN PURGATIVE PILLS are simply to compound of four simple berks now in universal was by the North American Indians, and we trust he is convinced of their supporting qualities and them? The terms that the confidence is the confidence of the confiden perior qualities and there "rowe perent to the care of every curable discose.
